## COUNTY SALES AND USE TAX REVENUE AND RATE CHANGES, 2011 - 2021

August 2022

Sales tax revenue is the lifeblood of the county general fund. While breakdowns vary county-by-county, sales tax revenue generally accounts for more than half of the revenue counties generate for their general fund. The sales tax applies to many commercial transactions, both for goods and services, however there are several exemptions which are not taxed. Counties can levy sales taxes in increments of 0.05% to a maximum of 1.50% for a number of permissible usages. For a current map of county sales tax rates, please refer to the CCAO's County Data Exchange page.

The table below shows the sales tax collections for each county from 2011 to 2021. Highlighted cells indicate that a change in the county's sales tax rate occurred; a green highlight means the rate increased while red indicates the rate decreased. A separate table showing just the year-end sales tax rate for each county is included after the revenue table.
